

Overview

By Laura Hall, WGSN-homebuilidlfe, 20 September 2012

The N.D.A kitchen is bold and bright. Strong colours are used in conjunction with duller pastels to create new combinations. Designs use angular geometric forms and faceted shapes and can be softened with rounded edges.

All kinds of coatings and silicones are used to give a contemporary edge. Patterns and styling are graphical and geometric while shapes are often interlinking or stacking. Shine and matt are also used to create contrasting effects.
